
Coseer Announces New Breakthrough in Affordable Cognitive Computing

Coseer announced a new breakthrough in its artificial intelligence, which enables Coseer's platform to learn from short form texts, process language without any grammar and automatically develop new language comprehension.

"With the new capability, our ability to automate language driven workflows has grown multifold.", said CEO Praful Krishna. Coseer's cognitive software understands language as a human would. The fast growing startup uses this technology to mimic tedious language-heavy tasks at big organizations. Once copied, these tasks are automated, accelerated and scaled up. Currently Coseer focuses on Financial Services, Healthcare and Knowledge Enterprises.

What is Next-Generation Enterprise Search?

Coseer's search solutions are transforming industries from healthcare to finance. Our point-and-shoot AI trains finds answers and insights with 95%+ accuracy within 4-12 weeks - all of this in 100% security. The reason? We founded Coseer on the principle that computers should take care of the boring stuff so that humans can focus on creativity and judgment. To that end, we've built enterprise search solutions to complete complex workflows just as humans would in a fraction of the time. Fortune 500 leaders are using Coseer to speed up and automate their most complex work.

We follow a tactical approach to enterprise search:

- We deliver 95-98% accurate solutions within 4-12 weeks.
- Our solutions deploy entirely behind your own firewall for 100% security, and every decision point is logged for full transparency.
- You add the finishing touches, but our point-and-shoot AI practically trains itself. No more huge training data sets or time wasted annotating and tagging.
