
Coseer Blog in Pipeline on Cognitive Innovation

“Artificial Intelligence is all the rage right now. Executives across sectors and across parts of value chain are looking to harness its promise and potential. However, the most popular AI technique, Deep Learning, is showing its limitations when applied to natural language.”

We will also be at the [Conversational Interaction Conference](#) and talk about some of these ideas. Contact us to connect or for the slide deck.

What is Next-Generation Enterprise Search?

Coseer's search solutions are transforming industries from healthcare to finance. Our point-and-shoot AI trains finds answers and insights with 95%+ accuracy within 4-12 weeks - all of this in 100% security. The reason? We founded Coseer on the principle that computers should take care of the boring stuff so that humans can focus on creativity and judgment. To that end, we've built enterprise search solutions to complete complex workflows just as humans would in a fraction of the time. Fortune 500 leaders are using Coseer to speed up and automate their most complex work.

We follow a tactical approach to enterprise search:

- We deliver 95-98% accurate solutions within 4-12 weeks.
- Our solutions deploy entirely behind your own firewall for 100% security, and every decision point is logged for full transparency.
- You add the finishing touches, but our point-and-shoot AI practically trains itself. No more huge training data sets or time wasted annotating and tagging.
