## Coseer featured in Datanami: Enterprise Search in 2020 and Beyond

Coseer founder/CEO Praful Krishna is featured in the below article published by Datanami.

We've talked a lot about the [coming revolution in Knowledge Management](#) led by forward-thinking companies, but we haven't specifically covered the enterprise search before.

Enterprise search is broken, but new technology is changing this much-maligned tool into a powerful competitive advantage.

To bring your company up to speed, we've pulled together five trends to watch from the changing definition of knowledge to the retreat of Deep Learning.

Don't miss the boat when it comes to next-gen enterprise search!

You can read the full article [here](#).

### What is Next-Generation Enterprise Search?

Coseer's search solutions are transforming industries from healthcare to finance. Our point-and-shoot AI trains finds answers and insights with 95%+ accuracy within 4-12 weeks - all of this in 100% security. The reason? We founded Coseer on the principle that computers should take care of the boring stuff so that humans can focus on creativity and judgment. To that end, we've built enterprise search solutions to complete complex workflows just as humans would in a fraction of the time. Fortune 500 leaders are using Coseer to speed up and automate their most complex work.

We follow a tactical approach to enterprise search:

- We deliver 95-98% accurate solutions within 4-12 weeks.
- Our solutions deploy entirely behind your own firewall for 100% security, and every decision point is logged for full transparency.
- You add the finishing touches, but our point-and-shoot AI practically trains itself. No more huge training data sets or time wasted annotating and tagging.
