Member of Technical Staff, India

We invite leading technical minds of this generation to be part of our high octane growth. This

job promises steep learning curves, huge responsibilities, and a high energy culture. At Coseer you have the opportunity to shape the evolution of this industry, and get tutored by the best. We are a small team, and each Member of Technical Staff has a very visible role to play.

We are looking for people who know their java well, and are demonstrably keen about one of AI/ML/NLP. Best candidates know how to manage their ego, are fun to work with, diligent, smart and hungry to learn and grow. We prefer M.Tech/ MS and B.Techs from IITs or equivalent but others are also welcome to apply. Your location is no bar.

What is Next-Generation Enterprise Search?

Coseer's search solutions are transforming industries from healthcare to finance. Our point-and-shoot AI trains finds answers and insights with 95%+ accuracy within 4-12 weeks - all of this in 100% security. The reason? We founded Coseer on the principle that computers should take care of the boring stuff so that humans can focus on creativity and judgment. To that end, we've built enterprise search solutions to complete complex workflows just as humans would in a fraction of the time. Fortune 500 leaders are using Coseer to speed up and automate their most complex work.

We follow a tactical approach to enterprise search:

- We deliver 95-98% accurate solutions within 4-12 weeks.
- Our solutions deploy entirely behind your own firewall for 100% security, and every decision point is logged for full transparency.
- You add the finishing touches, but our point-and-shoot AI practically trains itself. No more huge training data sets or time wasted annotating and tagging.
