## Introduction to Cognitive Calibration

Each piece of information has different value for a human mind. This lets us come to accurate conclusions quickly, and manage uncertainty very well. This is one of crucial things for a machine to learn, if it has to emulate human thought. In this 20 min webinar, Kalpesh Balar talks about the pathbreaking science and the art of Cognitive Calibration.

The startup Coseer brings advanced AI and NLP sciences to day-to-day decisions made on natural language or unstructured data. Our tactical cognitive computing technology automates repetitive workflows with 95%+ accuracy, and deploys within 4-12 weeks. Our strive to think like humans, and cognitive calibration is one of the key techniques that enables us to do that.

## What is Next-Generation Enterprise Search?

Coseer's search solutions are transforming industries from healthcare to finance. Our point-and-shoot AI trains finds answers and insights with 95%+ accuracy within 4-12 weeks - all of this in 100% security. The reason? We founded Coseer on the principle that computers should take care of the boring stuff so that humans can focus on creativity and judgment. To that end, we've built enterprise search solutions to complete complex workflows just as humans would in a fraction of the time. Fortune 500 leaders are using Coseer to speed up and automate their most complex work.

We follow a tactical approach to enterprise search:

- We deliver 95-98% accurate solutions within 4-12 weeks.
- Our solutions deploy entirely behind your own firewall for 100% security, and every decision point is logged for full transparency.
- You add the finishing touches, but our point-and-shoot AI practically trains itself. No more huge training data sets or time wasted annotating and tagging.
