Superior Intelligence with Cognitive Automation

Each business, as well as each professional, strives to get the best information about their products, competitors, regulatory environment and other important aspects. While such information is as easy to find as Google Search, the process is very difficult to scale in a time efficient way. This white paper talks about how tactical cognitive computing finds actionable nuggets of information from variety of disparate sources (Cognitive Intelligence).

- Coseer's Cognitive Intelligence is powered by Calibrated Quantum Mesh (CQM), an AI specifically developed for language.
- Cognitive Intelligence finds insights for each topic of interest just as a human would.
- Cognitive Intelligence prioritizes insights as per actionability based on models specific to each use.
- Cognitive Intelligence detects credibility of sources and ranks information accordingly.
- Clients can configure Cognitive Intelligence as part of their own workflows.

What is Next-Generation Enterprise Search?

Coseer's search solutions are transforming industries from healthcare to finance. Our point-and-shoot AI trains finds answers and insights with 95%+ accuracy within 4-12 weeks - all of this in 100% security. The reason? We founded Coseer on the principle that computers should take care of the boring stuff so that humans can focus on creativity and judgment. To that end, we've built enterprise search solutions to complete complex workflows just as humans would in a fraction of the time. Fortune 500 leaders are using Coseer to speed up and automate their most complex work.

We follow a tactical approach to enterprise search:

- We deliver 95-98% accurate solutions within 4-12 weeks.
- Our solutions deploy entirely behind your own firewall for 100% security, and every decision point is logged for full transparency.
- You add the finishing touches, but our point-and-shoot AI practically trains itself. No more huge training data sets or time wasted annotating and tagging.
